NORTH AMERICAN POLICE WORK DOG ASSOCIATION

“DEDICATED TO ASSISTING POLICE WORK DOG TEAMS THROUGHOUT THE WORLD”

CERTIFICATION RULES

All Reviewed or Revised and Approved May 06, 2017.

NORTH AMERICAN POLICE WORK DOG ASSOCIATION

CERTIFICATION RULES

Certification Rules will only be reviewed and changed if needed every odd year, e.g. 1995, 1997, 1999, etc. **Any proposed change(s) will be submitted in writing to the NAPWDA Secretary at least ninety (90) days prior to the summer Executive Board meeting held at the National Workshop.** The NAPWDA Secretary will forward a copy of the proposed change(s) to the NAPWDA Accreditation Chairperson. **If the proposed change(s) are not received in writing and at least ninety (90) days prior to the executive board meeting, it (they) will not be considered.**

The following test rules have been adopted by the North American Police Work Dog Association. Each of the following tests is designed to determine the proficiency of the work dog team for certification in each phase of police work for canines. Whenever practical, a police work dog team graduating from an accredited training school should be tested and accredited. The successful passing and accreditation of these courses is usually acceptable testimony in court. Each test is based on a pass/fail basis. Master Trainers and handlers should review these rules in their entirety. During any certification test, unwarranted aggression is grounds for failure.

There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.

Master Trainers:

Master Trainers will act as Evaluators for these tests. Master Trainers will designate the area, phase and manner of each phase to be tested. The Master Trainer should make every effort not to interfere with or distract the dog. The Master Trainer will observe the work dog during each test for willingness, enjoyment, interest and accuracy. Handlers will be observed for ability and overall control of his/her dog. A Master Trainer may decline to certify any team at his or her discretion and will explain their reason for declining to the handler.

Certification Validity:

Upon successful completion of each test the Master Trainer will issue permanent credentials and they will be valid for **one (1) year** from the date of issue. The team being tested must pass each phase of each test no matter in what order or combination they are tested in. A NAPWDA certification of a Regular member K9 team in any and all phases will **ONLY BE VALID when the K9 team is being utilized by:**

- (1.) The law enforcement agency they are employed by.
- (2.) A law enforcement agency they are on official assignment to by authority of their own law enforcement agency employer, (e.g. county, state, federal task force).
- (3.) A law enforcement agency which requested and received official mutual aid from the K9 team's law enforcement agency employer.

*****NOTE***** Under **NO** circumstances will a NAPWDA K9 team certification be valid when the team is being utilized for **ANY** and **ALL NON** law enforcement agency uses.

Certain Equipment Prohibited:

At no time during any of the certification tests will sticks or whips of any type be used. Collars, including pinch or electronic, may be used as long as it is proven to be properly worn and inactive if electronic, to the Master Trainer at the time of certification, **except that no electronic collar will be permitted to be worn during Explosive Detection certification or training regardless whether or not it is active or inactive.**

Fees:

- (1.) There will be a \$5.00 fee imposed for each phase which is failed. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**
- (2.) There is a \$20.00 fee for duplicate copies of completed test sheet(s) and/or certification certificate(s) from any year. This fee applies for both Regular and Associate members. The fee must be paid before any documents are released. Checks are made payable to NAPWDA. Handlers may contact the Master Trainer that conducted the testing and see if they have copies and if so request a copy. There is no charge for the copies if they come for the testing Master Trainer. It is the total responsibility of the handler to maintain and keep on file their NAPWDA certification test sheets and issued certificates. **Adopted 05-06-17.**

Appeal:

A work dog team that fails any of the following tests may reapply for testing at the next and most convenient date.

Test Results:

All of the following tests are recorded on a pass/fail basis. In the event of a team failure and subsequent re-test failure the Team must wait a period of no less than 15 days before retesting. If the initial failure happens at a National or State Workshop, and the Team elects to retest, the retest shall be conducted by the same Master Trainer who issued the original failure. Any work dog team that fails a test and feels that they have been tested unfairly, will, at the time of the test

notify the Master Trainer of his/her appeals. The handler will then file a complete report of his/her observations and the reasons they feel they were tested unfairly. The Master Trainer having been notified of the appeal will file a report of his/her observations, all testing sheets and basis for failing the team. All reports will be filed within thirty (30) days of the test at National Headquarters. Reports or copies thereof will be forwarded to an Appeals Committee. Findings of the Committee will be returned to National Headquarters and in turn forwarded to the handler and the Master Trainer. **The decision of the Appeals Committee must be by a majority vote and will be final.** *If during the time period that a certification certificate is issued for any or all phases, the K-9 team re-tests in any or all of the same phases **AND FAILS**, then the initial certificate which was issued in the failed phase or phases **will become NULL AND VOID.** Further, a letter to this effect will be sent to the K-9 team and their department, including the recommendation that they be re-tested with thirty (30) days of this notification.*

At the direction of the Master Trainer the handler will complete the following commands (Choice and order of command or signals will be at the direction of the Master Trainer.):

"Sit and Down" (by VOICE)

"Sit and Down" (by HAND)

The dog will then remain in a down or sit position (the position will be the handlers discretion) for three (3) minutes. During this three (3) minute period the handler may reinforce the command by voice or hand signal while no less than ten (10) feet nor more than thirty (30) feet away.

The Master Trainer will then instruct the handler to recall his/her dog by hand or by voice. At a point prior to reaching the handler, the Master Trainer **WILL** order the handler to stop his/her dog by voice or by signal. (Note: Stopping the dog may be either by a down or sit command). Upon completion of the "Stop", the Master Trainer will direct the handler to recall his/her dog to the "Finish" (heel) position by voice or signal command.

All tests given the K9 team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

NORTH AMERICAN POLICE WORK DOG ASSOCIATION

ARTICLE SEARCH TEST

This test is designed to test the police work dogs ability and proficiency in searching a designated area for articles having human scent on them. This would represent a search for discarded evidence or lost items. Master Trainers will observe the test from outside the search area. The Master Trainer will designate the search area.

SEARCH AREA:

The area to be searched will be no less than 60 feet by 60 feet. It will be covered by heavy vegetation no less than ten (10) inches high. The search area will be contaminated prior to the test by one or more subjects crossing through the area at least twice with a dog.

SEARCH ARTICLES:

Three (3) articles of different composition (metal, wood, paper, etc.) will be thrown at random into the search area. The team to be tested will not view this being done. One (1) article will be of metal composition. The articles to be used will be selected from, but not limited to, the following list:

- | | |
|-------------------------|-------------------------------------|
| a.) Plastic credit card | e.) Wood handle screwdriver (4"-6") |
| b.) Paper match book | f.) Crumpled cigarette package |
| c.) Shotgun Shell | g.) Empty metal hand gun |
| d.) Leather Wallet | |

Articles are to be selected by the Master Trainer according to availability.

TIME:

There will be a five (5) minute time limit for this test. A warning will be given when thirty (30) seconds remain for the test. Time will start when the handler sends his/her dog out to search from any point around the perimeter of the search area.

HANDLER:

The handler will inform the Master Trainer what the dog's final response is. The handler may enter the search area and direct the search as he/she would in an actual situation. After each final response and article recovery the handler will command the dog to continue to search. The dog will be tested on the final response to the search article. **This must be obvious to the Master Trainer.** The dog must make two (2) finds out of three (3) with a final response on both in order to pass this test. **Failure of this test may be based on lack of handler control, or disinterest on the part of the dog.**

All tests given the K9 team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

NORTH AMERICAN POLICE WORK DOG ASSOCIATION

AREA SEARCH TEST

The obedience test must be passed during the current consecutive maximum 7 day testing period prior to attempting certification this test. This test is designed to test the police work dogs ability and proficiency in search for a hidden suspect within a large area when no known track is available. The team being tested should use the wind and air currents to their best advantage.

MASTER TRAINER:

The Master Trainer will observe the team during the entire test. The Master Trainer will make every effort not to distract or interfere with the dog while he/she is working. The Master Trainer will designate the general area to be searched.

HANDLERS:

Handlers may select the starting point outside the search area that he/she wishes. The Area Search test may be administered on or off leash. If a leash is utilized it may be no less than 15 feet nor longer than 30 feet in length. The handler will inform the Master Trainer the area in which the suspect is hidden, within ten (10) feet of the suspect.

HELPER:

The helper will hide in the area at least ten (10) minutes prior to the beginning of the test. The helper should be an unknown person not normally used in training with the dog. The helper will hide themselves from view of the team using available concealment.

TIME AND AREA:

The area size the search takes place in and the time allowed for the search will be at the discretion of the Master Trainer.

All tests given the K9 team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.

NORTH AMERICAN POLICE WORK DOG ASSOCIATION

SEARCH and RESCUE AREA SEARCH TEST

The obedience test must be passed during the current consecutive maximum 7 day testing period prior to attempting certification this test. This test is designed to test the K-9 team's ability and proficiency in searching designated areas to locate a lost or missing person. **It is required that this canine team demonstrates sociability with the Master Trainer conducting this Search and Rescue Area Search Test prior to this certification. Any display of aggression by the K9 during any part of this test will constitute a failure.**

This certification test is open to current NAPWDA Regular and Associate members. Any accredited full Utility or Tracking/Trailing Master Trainer who has either provided to the NAPWDA secretary written documentation showing that he/she has successfully completed a formal Land Navigation class or who has attended the approved NAPWDA Land Navigation class (includes administration of this test), may conduct this certification test.

All handlers who wish to test must have a current certificate from the American Heart Association or the American Red Cross in Basic First Aid and CPR.

Land Navigation Testing:

All handlers must successfully complete Land Navigation Testing to the satisfaction of the Master Trainer prior to performing any field testing. The Master Trainer will forward all completed (passed and/or failed) written tests to the NAPWDA National Secretary no later than 90 days after it was administered. The handler is required to supply the following:

- I. Compass.
- II. Protractor.
- III. A Topographical Map.

The Master Trainer will require the handler to perform the following tasks:

- 1.) Utilizing the compass, shoot a bearing to a distance landmark selected by the Master Trainer.
- 2.) Utilizing the compass, orient the map.
- 3.) Give the declination of the map.
- 4.) Name a minimum of three (3) terrain features on the map selected by the Master Trainer.
- 5.) Given a compass (magnetic) azimuth, give the grid (map) azimuth for the map being utilized.
- 6.) Given a ten-digit UTM grid coordinate, find this point on the map.
- 7.) For a point given on the map, give the ten-digit UTM grid coordinate.
- 8.) Plot a bearing from the point in task #6 to the point task #7.
- 9.) Give the compass (magnetic) azimuth to be followed for the bearing in task #8.
- 10.) Give the approximate distance between these two (2) points.

The Master Trainer will determine if the handler has successfully completed Land Navigation Testing. The Master Trainer's decision is final.

It is the responsibility of the handler to ensure the Master Trainer has access to topographical maps of the area to be tested in. If the Master Trainer does not have maps of the area to be tested in, it will be the responsibility of the handler to supply them. If problems arise with the availability of topographical maps of the test area, the Master Trainer may select an alternative type of map for this test.

The handler must tell the Master Trainer what the K9 alert will be prior to entering the search area, and the "victims" will be unknown to the K9 team. The use of GPS devices is allowed during this portion of the test.

Test Areas:

The team shall be given grid coordinates on a map and must clear the assigned areas. There will be two (2) test areas; the combined area will be a minimum of 40 acres and a maximum of 160 acres. The terrain shall be light to medium and the area will be shortened if the terrain becomes denser. There will be anywhere from zero (0) to two (2) "victims" in each search area. Upon locating a "victim", it will be up to the handler if they want the subject to stay with them or leave the search area. The "victims" shall lie still and not stimulate or make any noises or movements to get the K9's attention. The alert must be obvious to the Master Trainer. The maximum time for both areas to be cleared will be two (2) hours.

There will be a break between search areas, and the K9 team may stop inside the areas to rest, which will not count towards the two (2) hour time limit. The length of the rest periods will be at the discretion of the Master Trainer. The team may not miss any victims in the time permitted, as this will constitute a failure. A team miss is any incorrect response by the K9 team. All tests given will be on a team pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. The handler and dog will be considered as a team and it is the team that will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.

This certification will be valid for one (1) year from the date of issue as defined in the Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

TRACKING TEST

This test is designed to determine if the police work dog is capable of tracking an unknown subject in an unfamiliar area. This test is intended to be closely simulative of working situations. This is a test of the dog's ability and proficiency and the handler's control of the dog.

HANDLERS:

Handlers shall use the appropriate equipment while tracking.

SUSPECTS:

The suspect will be unknown to the dog when possible. The suspect will receive instruction from the Master Trainer for the method and direction that the track is to be laid. **Before the track is laid, the Master Trainer will inform the Handler whether a suspect or a scent article from the suspect will be at the end of the track.**

TRACK:

The handler and dog will be secluded from view of the track while it is being laid. When the test begins the Master Trainer will inform the handler of the approximate area to begin. The handler will not be told in which direction the track leads. There will be one (1) fresh cross track laid at least fifteen (15) minutes after the original track is laid. The cross track will be laid by a second person to test the dogs scent discrimination. The track must be at least one quarter mile long and have at least two (2) types of surfaces which are covered (dirt, grass, concrete, asphalt, woods, etc.). The track will be at least one (1) hour old prior to beginning the test, and have at least three (3) turns in it. **Due to climatic conditions the age of the track will be at the discretion of the Master Trainer.**

All tests given the K9 team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

K-9 TRAILING TEST

This test is to determine if the police canine is capable of performing a trailing exercise in a simulation of conditions which are encountered during working situations by the police work dog team. This test is designed to test the dogs ability and proficiency and the handlers control of the dog.

HANDLERS:

Handlers shall use the appropriate equipment while trailing.

For this test, the handler and canine will be hidden from view prior to the test start. Whenever possible, the suspect will be an unknown person, not regularly worked with the canine. The Master Trainer will follow the handler and in no way interfere with or distract the canine. Due to climatic conditions, the age of the trail will be at the discretion of the Master Trainer.

The canine will start the trail one (1) hour old and trail at least one and one half miles. Surface cover at the start of the trail will be vegetation but will run at least 500 feet on pavement, cross a stream if available and cross two (2) fresh human trails. There will be at least 3 turns in this trail. **The suspect will remain at the end of the trail until found.**

This test will begin at the direction of the Master Trainer in the designated area. The handler will not be instructed in which direction the trail has been laid. The handler may encourage his/her dog as needed with commands and praise.

All tests given the K9 team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

NORTH AMERICAN POLICE WORK DOG ASSOCIATION

BUILDING SEARCH TEST

The obedience test must be passed during the current consecutive maximum 7 day testing period prior to attempting certification this test. This test is designed to be simulative of a working situation. Three (3) basic types of buildings are selected and described for use on this test. The Master Trainer will accompany the team to observe the entire test, as could happen when a backup officer or superior officer would accompany the work dog team during an actual search. Survival tactics should be considered.

BUILDING TYPES:

- 1.) Residential dwellings
- 2.) Warehouse, armory, barn, open areas within the building
- 3.) School, hotel, office building, multi-room interior

HELPERS:

- 1.) Will be hidden at least ten (10) minutes prior to the test start.
- 2.) Will be hidden in a place of concealment which is not visible to the work dog and handler.
- 3.) Will wear protective sleeve if necessary for protection.
- 4.) Whenever possible, will be a person unknown to the dog, and not normally used in training with the dog.
- 5.) Should be brought into the building by way of a different route than that to be used by the dog and handler.
- 6.) Will be placed in concealment at any height.

MASTER TRAINERS:

- 1.) Will designate the area of the building to be used for the test.
- 2.) Will designate the area in which the team is to begin their search.
- 3.) Will observe the team during the entire test. The Master Trainer should make every effort not to interfere with the test, and should confer with the handler to reach an agreement as how not to disturb the dogs work, follow behind and observe from doorways, ladder, etc.
- 4.) When it is obvious to the Master Trainer that the dog is not searching for the suspect, the Master Trainer will inform the handler of the failure for this test.

HANDLER:

- 1.) This test may be administered **on or off leash**. If a leash is utilized it may be no less than 15 feet nor longer than 30 feet in length.
- 2.) The handler may accompany the dog throughout the test, and may encourage his/her dog with commands and praise as needed.
- 3.) **In NO case will the handler open any doors that are closed within his/her search area.** Rooms with open doors should be searched thoroughly.
- 4.) The dog's final response of the location of the helper must be obvious to the Master Trainer. The handler will inform the Master Trainer of the helper location.

All tests given the K9 team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

NORTH AMERICAN POLICE WORK DOG ASSOCIATION

AGGRESSION CONTROL TEST

The obedience test must be passed during the current consecutive maximum 7 day testing period prior to attempting certification this test. This test is to determine if the police work dog is capable of performing exercises encountered by the police handler and his/her dog under simulated situations encountered while working. The test is designed to test the dog's ability, proficiency, courage, and the handler's total control of his/her dog.

There are three (3) phases of this test. The dog and handler will be tested in all phases in the order listed. Each phase is tested on a pass/fail basis and must be passed before proceeding to the next phase.

There are options for equipment utilized during the test. Prior to the test the Master Trainer must approve of the option utilized, inspect and approve all equipment used. Hidden, concealed protective gear will be worn by the suspect. This equipment is to be completely concealed by clothing so as to provide no visual cue to the dog as to its existence or location or a visible colored (other than jute color) full protective aggression suit may be used. In the event of any safety issue raised by the suspect, handler or master trainer, the master trainer has the discretion to mandate the use of a protective aggression suit described above.

The type of lead used by the handler will be at his/her discretion, but will not be over six (6) feet long. Each phase shall be completed off lead unless specified otherwise.

Guns and ammunition will be a handgun loaded with blanks which at least have the rapport of a .38 cal. live round and will be checked by a Master Trainer or their appointed steward prior to the phase.

Whenever possible, the suspect will be unknown to the dog. The suspects may be other handlers being tested or volunteers with the approval of the Master Trainer, or in some cases the Master Trainer themselves.

In the phases requiring the dog to physically apprehend the suspect, the dog must fully engage and hold/fight the suspect. Failure to engage or excessive, unnecessary mouthing and readjusting of the apprehension is grounds for failure.

In the phases requiring the dog to stop his pursuit and apprehension of the suspect, the handler may use any command or series of commands to control the dog. Failure of the dog to release and/or to respond to obedience commands in a timely manner is grounds for failure.

The handler must demonstrate sound tactics during all phases of the test. When a search of the suspect is called for the handler must demonstrate a safe approach, simulate handcuffing and search the suspect for weapons.

The order of the phases is as follows:

PHASE 1: Termination of Chase

The dog will begin this phase from the heel position. The suspect will begin at a distance of approximately 40 yards away from the team. At the direction of the Master Trainer, the suspect will run away from the team in any direction. The Master Trainer will inform the handler when to send their dog. The suspect will stop and surrender terminating the pursuit when instructed by the Master Trainer.

The type of call off used is at the handler's discretion, but the Master Trainer must be informed of the type to be used prior to the test. It may be one of the following:

- 1.) Dog is recalled to the heel position.
- 2.) Dog is commanded to the down, sit or stand position and the handler will join their dog or recall the dog to the heel position.
- 3.) The dog will display reasonable force or detaining behavior.

The importance of this test is that the suspect is not mouthed, nipped or bitten by the dog regardless of the type of call off used. Non aggressive incidental contact made by the dog while attempting to respond to the call off is not faulty. This phase will be complete when the dog is in the heel position with the handler.

PHASE 2: Gun Fire Control:

The dog will be in the heel position. The suspect carrying a handgun loaded with blanks which at least have the rapport of a .38 cal. live round, will start approximately 30 yards away from the team and run away. The suspect will fire a minimum of two shots as directed by the Master Trainer. The handler will then return fire with two shots. The dog will remain at the heel position at all times showing no signs of aggression. This phase is now complete.

PHASE 3: Chase and Apprehension of a Suspect:

Chase and Apprehension of a Suspect: The dog and handler from a position of cover, if available, will order the suspect to approach them. When the suspect refuses and after that handler issues the appropriate verbal warnings, the handler will command their dog to apprehend the suspect. The handler shall move to a position of cover if available. The dog will pursue, apprehend and hold the suspect. Upon the handler's arrival at the location of the dog and suspect and at the discretion of the Master Trainer, the handler will command the dog to release and call off. The handler then orders the suspect to an appropriate position, approaches the suspect and then simulates handcuffing and a search of the suspect. During this process, the suspect will display behavior consistent with a suspect that has just been bitten, including stumbling, loud vocalization and passive resistance. The amount of stimulation displayed will be at the discretion of the Master Trainer. Any additional intentional physical contact by the dog with the decoy at any time following the release of the initial apprehension will result in failure. *(Effective 01-01-2018)*

All tests given the K9 team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in the Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

NORTH AMERICAN POLICE WORK DOG ASSOCIATION

NARCOTIC DETECTION TEST

This test is designed to determine the proficiency and reliability of dogs in the detection of narcotics. As defined by the NAPWDA narcotic detection rules for testing, the minimum acceptable level required to pass is 91.66%. The basic narcotic odors (and their derivatives) that can be tested in are marijuana, cocaine, heroin and methamphetamine and are not to exceed five (5) different narcotic odors. **The safety of the detection dog will be the sole responsibility of the handler, (such as overdose).** The general rules for testing narcotic detection dogs will be as follows:

- 1.) The "Reward toy or object" used during a narcotic detection certification test, to reward the dog upon finding a narcotic hide, **WILL NOT** contain any narcotics or narcotic odor/residue.
- 2.) **All odors attempting to be certified in WILL be hidden in ALL areas tested in. Conflict odors will be present in all testing areas.**
- 3.) All searches will include a minimum of two (2) blank uncontaminated areas to be searched, e.g. vehicle, room, luggage, locker, area, etc.
- 4.) **Testing will be conducted in at least three (3) areas.**
Areas of concealment are:
 - a.) Vehicles, mandatory search area and mandatory minimum 6 vehicles for test (inside and outside count as one (1) area.).
 - b.) Buildings, mandatory search area.
 - c.) Any other designated areas.
 - d.) If luggage, any type of package or container is used, there will be a minimum of 15 pieces used for testing.
 - e.) If lockers are used, there will be a minimum of 25 lockers used for testing.
- 5.) A "**team miss**" is defined as any incorrect response by the K9 team.
- 6.) **Only one (1) miss total overall** of all odors attempted to be certified in, will be permitted for a successful "pass" certification. *If the testing K9 team has more than one (1) team miss, which is a failure, then the K9 team MUST RETEST in ALL PHASES AND in ALL ODORS that they are seeking accreditation for.*
- 7.) Narcotics certified in will be listed by their "Laboratory" names on the certification certificate.
- 8.) **Pseudo narcotics WILL NOT** be used for certification tests.
- 9.) The Master Trainer will place the aids in locations unknown to the team. Hides may be high or low.
- 10.) The amount of narcotic substance used for testing will not be less than one (1) gram.
- 11.) When testing in three or more odors of narcotics, a minimum of one (1) hide of each odor attempted to be certified in WILL be hidden in "Building" searches and in "Other" searches, tested in.
- 12.) When testing in three or more odors of narcotics, there will be a minimum of one (1) hide of each odor attempted to be certified in, hidden INSIDE the vehicle and a minimum of one (1) hide of the SAME ODOR, hidden on the OUTSIDE of the vehicle, thus making a TOTAL of two (2) hides of EACH ODOR attempted to be certified in for the vehicle portion of the narcotic detection certification test. There will be at least two (2) blank uncontaminated vehicles searched/used during this test.
- 13.) If only one (1) odor is attempted to be certified in, there WILL be a minimum of twelve (12) total finds, consisting of a minimum four (4) hides in building search, minimum four (4) hides in "Other" searches, and a minimum of four (4) hides - two (2) inside and two (2) outside a vehicle. There will be at least two (2) blank uncontaminated vehicles searched/used during this test.
- 14.) If two (2) odors are attempted to be certified in, there WILL be a minimum of twelve (12) total finds, consisting of a minimum two (2) hides of each odor in building search, minimum two (2) hides of each odor in "Other" searches, and a minimum two (2) hides of each odor - one (1) of each odor inside and one (1) of each odor outside a vehicle. There will be at least two (2) blank uncontaminated vehicles searched/used during this test.

15.) Time limits on searches will be at the discretion of the Master Trainer and so long as the Master Trainer determines that the team is still working.

**** NOTE: There will be a break between the narcotic building searches and the narcotic vehicle searches.****

All tests given the Narcotic Detection Team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

NORTH AMERICAN POLICE WORK DOG ASSOCIATION

EXPLOSIVE DETECTION TEST

This test will determine the proficiency and reliability of dogs in the detection of explosives. **No electronic collar will be permitted to be worn by the K9 during Explosive Detection certification or training regardless whether or not it is active or inactive.**

Search Time: It is recognized that increased search time endurance and proficiency of the explosive detection canine teams for deployment and future training requirements is necessary. Agencies should be including this in their in-service trainings. Explosive Detection K9 teams should be training towards being able to work 30 minute searches and still be proficient.

During testing, all necessary precautions should be taken to ensure that the handler has no prior knowledge as to the location of explosives training aids. Canine teams should search the way they were trained. No assistance or leading the team by the Master Trainer or anyone else, shall be permitted. The canine team should be able to locate all explosive training aids within a 2 meter (6.56 feet) radius of the source without disturbing the source, regardless of the height of the source, barring extenuating environmental conditions deemed relevant by the master trainer. If the handler identifies a canine final response that is within 3.05 meters (10 feet) of a hidden explosives training aid, but not in the immediate area of the explosives training aid, the master trainer will advise the handler "Not at Source." Prior to the test beginning and to encourage handlers to trust their canine and discourage handlers from counting the training aids during testing, handlers shall be informed by the Master Trainer that once they leave a search area, (room, vehicle, etc.) they will not be permitted to come back to that specific search location.

All canine teams must be tested on ALL odors. The mandatory odors to be tested on are:

Mandatory Odors:

- 1.) Powders (Black, Single Base Smokeless and/or Pyrodex)
- 2.) Double Base Smokeless and/or Triple Base Smokeless Powder
- 3.) Commercial Dynamite (AN or NG)
- 4.) (RDX) Plastic Explosive (C-4 or Flex-X) Semtex, A5
- 5.) T.N.T or Military Dynamite or Comp B
- 6.) (PETN) Primer Cord or Det Cord – Sheet Explosives (or substituted explosive with PETN, Master Trainer Discretion)
- 7.) Water-Gel or Slurries or Emulsion

In addition to the mandatory odors and at the discretion of the Master Trainer the below optional explosive odors may be utilized for testing.

Optional Odors:

- 1.) Black powder substitutes.
- 2.) Blasting agents.
- 3.) Cast boosters.
- 4.) Nitromethane.
- 5.) Photoflash/fireworks/pyrotechnic powders.
- 6.) Plastic explosives (unmarked and marked with detection agent).
- 7.) Tetryl.

Homemade explosives (HME) that include:

- 1.) Chlorate based mixtures (e.g., potassium chlorate and Sodium chlorate).
- 2.) Nitrate based mixtures (e.g., Ammonium nitrate, Urea nitrate).
- 3.) Perchlorate based mixtures (e.g., potassium perchlorate).

Due to the increased popularity of improvised explosives, nitrated and peroxide based explosives used by terrorist elements worldwide, it is recommended that the current testing standard include peroxide based and nitrated explosives when available. Once the seven (7) basic odors are tested and Peroxide Based and Urea Nitrate Explosives are available, at the Master Trainer's discretion, the Certification Test may include Peroxide Based Explosives and/or Urea Nitrate. Due to the sensitivity and safe handling of the explosive compounds listed, it is recommended that an exception to certification weights be allowed. Current availability of Peroxide Based Explosives is limited to one (1) to two (2) grams in order to handle and transport the explosives safely. It is further recommended that at least one (1) gram of the explosive compound be used during testing and not "trace" amounts.

The maximum weight of explosives used shall be unlimited; however a minimum of 113.4 grams (¼ pound) shall be used for testing **except for the Peroxide Base Explosives. Those weights are written above.** Each area tested will contain three (3) aids. Each aid will be a different explosive. The handler will not be informed of the actual type of explosive training aids being utilized for testing. The term "explosive aid" will mean any explosive substance used for NAPWDA certification testing.

Five (5) areas will be provided for testing. The canine team will be tested in four (4) of the five (5) areas. The five (5) areas will be:

- 1.) Building (see page 25 for definition)
- 2.) Vehicles (see page 25 for definition)
- 3.) Baggage (see page 25 for definition)
- 4.) Open Area (see page 25 for definition)
- 5.) Aircraft, Watercraft or Mass Transit Vehicle (see page 26 for definitions)

The canine team must search the areas of Building, Vehicles and Baggage. The fourth area will be either Open Area, Aircraft, Watercraft or Mass Transit Vehicle.

To successfully test for certification, **the dog's final response must be passive** and the canine team **CANNOT miss more than one (1) explosive aid in all phases of testing.** A "**team miss**" is defined as any incorrect response by the K9 team. This **includes but is not limited to:**

- 1.) All improper responses (such as the dog giving its final trained response to non-explosive odor).
- 2.) Failure to detect the explosive aid (includes when the handler fails to direct the K9 to search the area where the explosive aid is hidden).
- 3.) The K9 exhibiting any Aggressive Response.
- 4.) Exceeding the allotted testing time.
- 5.) Opening of any closed doors, drawers or containers of any kind by either the handler or K9.

If the testing K9 team has more than one (1) team miss, which is a failure, then the K9 team MUST RETEST in ALL PHASES and in ALL ODORS that they are seeking accreditation for. All testing will be done on a pass/fail basis. The minimum acceptable level required to pass is 91.6% as defined by the NAPWDA explosive detection rules. It is recommended that testing be administered over a two (2) day period or more. The final decision as to the length of the testing period shall rest with the Master Trainer conducting the certification. All aids will be placed at least thirty (30) minutes prior to the testing of the canine team. **NO DETONATING DEVICES WILL BE allowed to be used for testing or BE PLACED WITH THE EXPLOSIVE TRAINING AIDS! ALL HANDLING OF EXPLOSIVE TRAINING AIDS WILL BE DONE IN A SAFE MANNER!** If an explosive aid requires being moved to a new location, the previously used area will be removed as a testing sight. An Accredited NAPWDA Master Trainer in Explosive Detector Dogs will conduct all testing.

Prior to the first explosive detector team entering the test area, a human and canine will walk through the testing area. Prior to testing, each handler will brief the Master Trainer as to the particular dogs alert and response to the explosive aids. Each indication to an explosive training aid by the canine will be obvious to the Master Trainer. Prior to each phase, the Master Trainer will inform the handler of the boundaries, time, starting point, etc. of the search problem. With the exception of an Aircraft Search, **a maximum time limit of thirty (30) minutes will be allotted for each phase of testing.** There is no maximum time limit during an Aircraft search. The Master Trainer can terminate the test and fail the team if at the discretion of the Master Trainer the team is **not** working. The Master Trainer will maintain the time limit during the testing and will begin when the canine team begins to search. The test time will stop upon the handler's indication that the search is complete or the time expires. Conversation between tested and untested handlers will not be allowed while testing is in progress. Handlers undergoing testing will not be allowed to observe other canine teams during the testing procedure.

No overly harsh or inappropriate physical corrections by the handler to the dog will be permitted. At the Master Trainers discretion, any such behavior will be grounds for a failure of the Explosive Detection Test.

The purpose of accreditation testing is to observe the team's ability to locate a hidden explosive. It should be noted that all explosive aids may not be pinpointed to source by the dog due to height, wind current or placement of the aid. The Master Trainer will exercise reasonable judgment and the handler should consider all changes in behavior by the dog towards explosive odor.

Each certification certificate will be valid for one (1) year from the date of the test. It should be noted that normal training and retraining of the canine team must be conducted to maintain and enhance the team's capability.

All explosive aids used in testing should be of recent manufacture and in separate containers. It will be the responsibility of the agencies being tested to provide the required explosive aids. All explosive aids utilized for testing will be actual explosives. No pseudo or non-explosive substitutes will be used for testing. STRICT SAFETY MEASURES will be upheld during testing! All outdoor testing will immediately discontinue with the imminent threat of any inclement weather that is associated with lightning. All explosive aids will be placed in such a manner that the dog cannot touch or retrieve same.

Use of Distracters:

Natural distracters are normally present and vary depending on the area where the certification testing is done. Placement of distracters in the certification area is required when no natural distracters are present. Care must be taken not to place artificial distractions in a manner that causes contamination with the test substance odor. Distracters can be the same as used in the odor recognition assessment.

BUILDING SEARCH (mandatory):

The building search will consist of four (4) rooms to be searched by the canine team. Each room will be a minimum of 400 square feet in size and contain some type of furniture. Only one (1) explosive aid will be placed within

each room. One room will be blank, containing no explosive aid. The explosive aids will be placed anywhere from eight (8) feet high to ground level. The handler and/or dog will not open any closed doors, cabinet's desk drawers, etc. during testing.

VEHICLE SEARCH (mandatory):

A minimum of eight (8) motor vehicles will be utilized for testing. Any type or model of passenger vehicle, including pickup trucks, tractor-trailers, vans and buses may be utilized for testing (subject to availability). Testing may include the interior of vehicles. The vehicles will be parked in a configuration similar to a parking lot in order to allow access to each vehicle by the canine team being tested. Only one (1) explosive aid will be placed on or in each vehicle.

One (1) explosive aid must be placed inside of a closed engine compartment. Additional explosive aids will be placed on or within the vehicles at the discretion of the Master Trainer; recommended but not limited to:

- 1.) Fuel tank exterior or fuel filler pipe.
- 2.) Drive shaft.
- 3.) Interior of closed trunk compartment.
- 4.) Closed passenger compartment.
- 5.) Undercarriage.
- 6.) Outer body.

BAGGAGE SEARCH (mandatory):

The type of baggage utilized for testing will be defined as hard and soft shell suitcases, attaché, cases, clothing bags, briefcases, golf bags, sea bags, duffel bags, boxes, parcels and any other containers used for the transport of personal items or shipping purposes. The Master Trainer will have ultimate discretion over the types of bags utilized for testing. A minimum of twenty (20) bags will be utilized for testing. All explosive aids will be secured within each bag utilized for testing. One (1) or more bags should contain clothing or other items associated with the types of baggage used. The baggage should be placed in a straight line and broken up into rows.

OPEN AREA SEARCH:

Open area search shall be defined as:

- 1.) Building Exteriors.
- 2.) Open fields.
- 3.) Wooded areas.
- 4.) Any area outside not covered in the above.

The Open Area utilized for testing will be no larger than 100 yards by 100 yards (300 feet by 300 feet) and no smaller than 50 yards by 50 yards (150 feet by 150 feet) or any configuration thereof. At the discretion of the Master Trainer, all explosive aids will be placed no more than 3 feet below surface level to a maximum of eight (8) feet above surface level.

Important Notice regarding Aircraft, Watercraft and Mass Transit Vehicles used during NAPWDA Certification Testing:

It is **highly recommended by NAPWDA** that the testing Master Trainer record the Registration numbers of Aircraft, Watercraft, or Mass Transit Vehicles used during the Certification Test on the NAPWDA Certification Test sheet. This high recommendation is due to the wide use of Aircraft, Watercraft, and Mass Transit Vehicles in NAPWDA Certification Testing and the possibility of inadvertent odor contamination of these Aircraft, Watercraft, and Mass Transit Vehicles and the further possibility of these being used again for Certification Testing and/or training in other jurisdictions. The registration numbers noted on the NAPWDA Certification Test sheet would afford The North American Police Work Association an ability to track Aircraft, Watercraft, and Mass Transit Vehicle used in Certification Testing, should there be a need. **Registration Number:** Is any identifying number, either permanent or temporarily, assigned to an Aircraft, Watercraft, or Mass Transit Vehicle.

AIRCRAFT SEARCH:

The availability of aircraft will be the deciding factor in this phase of testing and at the discretion of the Master Trainer. Commuter, commercial and military aircraft capable of carrying a minimum of 16 people may be utilized for this test phase. Inoperable aircraft (used for ground training purposes only but mechanically incapable of flying) are acceptable for certification purposes. The search shall include the interior and exterior of the aircraft along with all ground support equipment. One (1) explosive aid will be placed in the interior of the aircraft. The interior of the aircraft includes the passenger compartment, cockpit, lavatories and cargo compartments. Additional explosive aids may be placed at the discretion of the Master Trainer either inside or outside the aircraft. The exterior of the aircraft includes the landing gear, wings, engines and ground support equipment. **There is no time limit during the aircraft search test. Strict safety measures while working inside of a busy airport will be adhered to. All explosive aids used will require the use of a "Barrier" object such as a towel, paper towel, cardboard, etc., to prevent the explosive aid from coming into direct contact with any physical part of the aircraft, causing residue contamination.**

WATERCRAFT SEARCH:

The availability of watercraft will be the deciding factor in this phase of testing and at the discretion of the Master Trainer. The types of watercraft used for testing shall be, but not limited to, cruise ships, freighters, cargo ships, tug boats, barges, military vessels or any other type of watercraft with an open deck and an interior cabin area. One (1) explosive aid

will be placed inside of an interior portion of the watercraft such as a cabin, wheelhouse, cargo compartment or engine room. Two (2) explosive aids will be placed on or about the open deck area of the ship or dockside support equipment. **Strict safety measures while working near the water and around steep stairwells, which are the norm for many ships, will be adhered to. The Master Trainer will use discretion in placing explosive aids in a location that may expose the canine team to the risk of falling overboard or being injured by deck equipment. On smaller watercraft, personal flotation jackets should be utilized.**

MASS TRANSIT VEHICLE SEARCH:

The availability of Mass Transit Vehicles will be the deciding factor in this phase of testing and at the discretion of the Master Trainer. Passenger trains, subways, overhead rail and commercial touring buses will be utilized for testing. A minimum of one (1) explosive aid will be placed in the interior of the mass transit vehicle. Additional explosives may, at the discretion of the Master Trainer, be placed either inside or outside of the mass transit vehicle. The exterior includes support equipment, loading docks, platforms and baggage handling equipment. **Strict safety measures while working near busy rail yards, depots and electrical equipment will be adhered to. All explosive aids used for testing will require the use of a "Barrier" object such as a towel, paper towel, cardboard, etc., to prevent the explosive aid from coming into contact with any physical part of the mass transit vehicle causing residue contamination.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

Explosive Odor Recognition Assessment (Optional):

The main purpose of the Explosive Odor Recognition Assessment is not meant to be a pass / fail test but rather an assessment tool by the Master Trainer on the first day of the training / certification workshop. The Odor Recognition Assessment is designed to assess the canine's ability to detect the required explosive odors and to improve the K-9 team's proficiency on the odors they're having difficulty detecting. **This is NOT a NAPWDA Certification and will only be noted on the test sheet under the "Master Trainer Comments" section.**

The Explosive Odor Recognition Assessment is strictly optional at the discretion of the Master Trainer. If the Master Trainer has a large number of K-9 Teams, he/she may not have time to conduct an Odor Recognition Assessment. If the Master Trainer chooses, he/she can attempt to imprint the canine on the odors missed in the Explosive Odor Recognition Assessment. The K-9 Team can choose to attempt certification regardless of how they did in the odor recognition Assessment.

The Explosive Odor Recognition Assessment is not meant to replace any other federal, state or local agencies Odor Recognition Test or program. The following is a guideline in setting up the Explosive Odor Recognition Assessment:

The Odor Recognition Assessment consists of 20 one gallon metal paint cans or concrete blocks. Inside each one gallon can or block should be a smaller quart can. The purpose of the smaller quart paint can is to hold the training aid and to help prevent the dogs from getting the explosive training aids. The smaller quart paint cans should have lids on them with a minimum of eight (8) 1/16 inch diameter holes in each lid.

The selection and quantity of explosives used in the Odor Recognition Assessment are left up to the discretion of the Master Trainer. The selection of explosives / oxidizers used should be from the approved list of basic odors, oxidizers or improvised explosives. The intent is to use the same odors in the assessment that will be used during the certification test. Caution should still be taken to prevent the canines from getting the training aids. The containers can be set up in a straight line or a large circle.

Many agencies who currently have odor recognition test are mission specific. Some agencies are looking for trace amounts as well as larger amounts. Many other agencies don't want their canine's threshold brought down so low. Each one of these mission specific canine programs plays a very important role in fighting both domestic and international terrorism. Our Master Trainers work with a wide range of canine teams with different missions. The intent of giving the Master Trainers the discretion on the amounts is to give the Master Trainer flexibility in working with these different teams without changing the way the canine teams have been trained.

The containers used in the Odor Recognition Assessment should be one gallon metal cans or 8 in. x 8 in. x 16 in. concrete blocks. The containers used should be kept as sterile as possible. Note: If training with peroxide based explosives i.e. TATP and HMTD, concrete blocks should be used for safety reasons.

Each large circle or straight line should have ten (10) one gallon paint cans with a quart can inside evenly spaced about 3 feet apart from each other. Five (5) of the cans in each circle or straight line should have a small amount of a target explosive odor. The five (5) other one gallon cans in each circle or straight line should contain small amounts of distracter odors commonly found during searches i.e. dried cat food / dog food, pieces of rubber gloves, pieces of kongs and tennis balls, etc.

The canine should show a change in behavior and a recognizable passive alert on each can or block containing an explosive training aid. The canine should detect all 10 explosives odors with no team miss. To make the cans more stable so the dogs will not knock them over, each one gallon can should be screwed down to a 12 inch x 12 inch square piece of plywood board using a ½ inch screw. Cost of the materials and equipment is the responsibility of the host or requesting agency.

ACCELERANT DETECTION TEST

This test will determine the proficiency and reliability of dogs in the detection of accelerant odors in a variety of realistic search scenarios. **The only Associate member permitted to test in Accelerant Detection is an active firefighter that is the canine handler or trainer with their fire department and is assigned arson investigation duties through the use of the trained Accelerant K9 for that department. This test certification will not be valid for any private or non-Fire/Law Enforcement Department investigation.**

The Associate member accelerant canine handler **must** provide the testing Master Trainer(s) Proof of Completion of the following courses **prior to testing:**

1. Crime Scene Preservation Course
2. HAZMAT Awareness Course
3. Blood borne Pathogens Course
4. NIMS and ICS Training Courses, IS-100.B, IS-700.A, IS-200.B, IS-800.C (Formerly IS-800.B).

The testing Master Trainer will attach the submitted proof of completion of the above courses to the certification test sheet that he/she will send in to the NAPWDA secretary who will issue the associate member certification certificate.

For certification the team CANNOT miss more than one (1) aid in all phases of testing. A “team miss” is defined as any incorrect response by the K9 team. **If the testing K9 team has more than one (1) team miss, which is a failure, then the K9 team MUST RETEST in ALL PHASES AND in ALL ODORS that they are seeking accreditation for.** It is recommended that the testing be done over a two (2) day period or more. However this is only a recommendation and the final decision shall rest with the Master Trainer. All aids will be placed at least five (5) minutes prior to testing. As defined by the NAPWDA accelerant detection rules for testing, the minimum acceptable level required to pass is 91.6%.

For the purpose of these certification rules, the term “Aid” is a sample of an accelerant that has been poured or dropped in an area.

All canines must be tested on **nine (9) different** accelerant odors made up of **three (3)** odors from each division of heavy, medium and light hydrocarbons. The odors that may be used to test each division are as follows:

<u>Heavy</u>	<u>Medium</u>	<u>Light</u>
1.) #2 Fuel Oil	1.) Paint & Varnish Remover	1.) Charcoal Lighter Fluid
2.) Diesel Fuel	2.) Lacquer Thinner	2.) Paint Thinner
3.) Gum Turpentine	3.) Kerosene	3.) Naphtha
4.) Lamp Oil	4.) Gasoline	4.) Dry Gas
5.) Transmission Fluid	5.) Gasohol	5.) Acetone
6.) Jet-A-Fuel	6.) Octane	6.) Coleman Fuel

It shall be the responsibility of the agencies / K9 teams being tested to provide samples of all accelerant odors. The Master Trainer will select the odors used to test each division at random from these samples.

The maximum amount used for testing shall be ¼ cup and the minimum amount shall be one (1) drop from a hypodermic syringe and needle. Each area tested will contain a minimum of three (3) aids and a maximum of four (4) aids with each being a different accelerant odor. The handler will not be told the number or type of accelerant aids they are searching for.

Five (5) areas will be provided for testing. The canine team will be tested in four (4) of the five (5) areas. The five (5) areas will be:

- 1.) Structure / Fire Scene
- 2.) Open Area
- 3.) Paint Can Line Up
- 4.) Clothing Line Up
- 5.) Vehicle Interior

The areas will be picked by availability.

Structure / Fire Scene: The structure / fire scene search shall consist of either an intact structure or the site of a structure fire. If a structure fire scene is selected, the fire must have occurred not less than eight hours nor more than three months prior to the test being conducted. The size of the area used for testing shall be not less than 1600 square feet or more than 2400 square feet. The dog will be searched through the area prior to aids being placed to ensure that no accelerant odors are present in the search area. The aids may be placed anywhere from a height of four (4) feet to a depth of three (3) inches under debris or ash.

Open Area Search: Open area shall be defined as: 1.) Exterior of buildings. 2.) Open Fields. 3.) Wooded area. 4.) Any outside area not covered in above. The area is to be no larger than 100 yards by 100 yards and no smaller than 50

yards by 50 yards or any configuration thereof. Aids used in this search shall consist of a minimum of ¼ cup of accelerant poured on the ground or a container concealed in the area containing at least 1/8 cup of accelerant.

Paint Can Line Up: It shall be the responsibility of the agencies / K9 Teams being tested to provide the correct number of properly prepared paint cans for this test. A minimum of six (6) and a maximum of ten (10) unused one gallon paint cans, each containing burned wood, paper and plastic material are placed in a line a minimum of three (3) feet apart. No accelerant material is used to prepare the ash samples. If the dog to be tested indicates aggressively (scratching & biting) lids are placed on the paint cans with a minimum of eight (8) 1/16 inch diameter holes in each lid.

Clothing Line Up: A minimum of six (6) and a maximum of ten (10) piles of recently worn clothes are placed in a line a minimum of three (3) feet apart.

Vehicle Interior: A minimum of six (6) and a maximum of ten (10) vehicles of any type or model are parked in a line (such as a parking lot) so as to allow the team to have access to each vehicle. All aids will be placed in the interior (passenger compartment) of the vehicles and the teams will confine the search to the vehicle interiors only.

Prior to the first team entering the test area a person and canine will be walked through the testing area. Each handler shall brief the Master Trainer as to the dogs alert and response to aids prior to testing and each indication to an aid by the canine should be obvious to the Master Trainer. Prior to each phase the Master Trainer shall explain each problem that will be encountered by the handler such as boundaries, starting point, etc.

There is no time limit for a team to complete each phase of testing; however, the Master Trainer may stop the test once it has been made evident that the team cannot locate the aids.

All tests given the Accelerant Detection Team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. It should be noted that normal training and retraining must be conducted to maintain and enhance the teams' capability. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

WILDLIFE SEARCH TEST

This test is designed to test the proficiency and reliability of dogs in the detection of wild game (wildlife). As defined by the NAPWDA wildlife detection rules for testing, the minimum acceptable level required to pass is 91.66%. **The safety of the detection dog will be the sole responsibility of the handler.** The general rules for testing wildlife detection dogs will be as follows:

- 1) The “reward toy or object” used during a wildlife detection certification test, to reward the dog upon finding a wildlife hide **WILL NOT** contain any portion of the target wildlife.
- 2) **All odors attempting to be certified in WILL be hidden in ALL areas tested in. Conflict odors will be present in all testing areas.** Before beginning the test, the handler will inform the Master Trainer what the trained final response of the dog is to the target odors. A non-target species specimen will be present in at least one search area unknown to the handler. The dog must not give its trained final response to the non-target specimen and the handler must not call an alert to it. Either of these will be considered a team miss.
- 3) All searches will include two (2) blank uncontaminated areas to be searched, e.g. vehicle, room, luggage, locker, area, etc.
- 4) **Testing will be conducted in at least three (3) areas.**
Areas of concealment are:
 - a) Buildings. **Mandatory Search**
 - b) Vehicle (which can include automobiles, watercraft, aircraft, etc.) **Mandatory Search**
 - c) Other (area [minimum of 2500 square **feet**], packages, lockers, luggage/containers, etc.)
 - d) If luggage, any type of package or container is used, there will be a minimum of fifteen (15) pieces used for testing.
 - e) If lockers are used, there will be a minimum of twenty five (25) lockers used for testing.
- 5) A “**team miss**” is defined as any incorrect response by the K9 team.
- 6) **Only one (1) miss total overall** of all odors attempted to be certified in, will be permitted for a successful “pass” certification. **If the testing K9 team has more than one (1) miss, which is a failure, then the K9 team MUST RETEST in ALL PHASES and in ALL ODORS that they are seeking accreditation for.**
- 7) Wildlife successfully certified in will be listed by their scientific names (genus and species) on the certification certificate.
- 8) The Master Trainer will place the aids in locations unknown to the team. Hides may be high or low.
- 9) Quantities: For large species (described as any species whose potential adult weight is 100 lbs. or greater) scent materials will be no less than ½ lb. in weight. For smaller species the scent materials will be no less than one ounce in weight. This will be at the discretion of the Master Trainer based upon species size and availability.
- 10) Handler must provide verifiable testing materials along with the scientific (Genus and species) names of the target wildlife. For large species, materials must be taken from the upper torso of the animal. **Pseudo materials WILL NOT be used for certification purposes.**
 - 10.1) Methods of verifying testing materials:
 - a) Certificate of Authenticity from a recognized laboratory, veterinarian or wildlife biologist.
 - b) Scent material must be reasonably fresh as determined by the Master Trainer.
 - 11) When testing in three (3) or more odors of wildlife, a minimum of one (1) hide of each odor attempted to be certified in WILL be hidden in the building search **and** in the “Other” search, tested in.
 - 12) When testing in three (3) or more odors of wildlife, a minimum of one (1) hide of each odor attempted to be certified in hidden INSIDE the vehicle and a minimum of one (1) hide of the SAME ODOR hidden on the outside of the vehicle, thus making a TOTAL of two (2) hides of EACH ODOR attempted to be certified in for the vehicle portion of the wildlife detection certification test. There will be at least two (2) blank uncontaminated vehicles searched/used during this test.
 - 13) If only one (1) odor is attempted to be certified in there WILL be a minimum of twelve (12) total finds, consisting of a minimum four (4) hides in building search, minimum four (4) hides – two (2) inside and two (2)

outside a vehicle and a minimum 4 hides in the “Other” search. There will be at least two (2) blank uncontaminated vehicles searched/used during this test.

14) If two (2) odors are attempted to be certified in, there WILL be a minimum of twelve (12) total finds, consisting of a minimum of two (2) hides of each odor in the building search, a minimum of two (2) finds of each odor – one (1) of each odor inside and one (1) of each odor outside a vehicle, and a minimum of two (2) hides of each odor in the “Other” search. There will be at least two (2) blank uncontaminated vehicles searched/used during this test.

15) Time limits on searches will be at the discretion of the Master Trainer and so long as the Master Trainer determines that the team is still working.

All tests given the Wildlife Search Team will be on a pass/fail basis. The Master Trainer will determine if the team will be certified upon the completion of the test. **The handler and dog will be considered as a team and it is the team who will be certified. If the dog changes handlers, a new team exists and the team will need to be certified.**

This certification will be valid for one (1) year from the date of issue as defined in Certification Validity paragraph. **There will be no fee charged for NAPWDA certification testing. A fee may be imposed to cover expenses of travel, lodging and meals only, if necessary.**

Master Trainer or Trainer Applicant Critique Form Instructions

The following are the instructions for filling out and filing all Master Trainer or Trainer applicant critique forms. These instructions must be strictly adhered to otherwise your application packet will not be considered complete and therefore will not be considered at the accreditation committee meeting or Executive Board meeting.

No critique hours will be given to an applicant for NAPWDA certification testing.
